

4APT-APB

Harold F. Reheis, Director
Environmental Protection Division
Georgia Department of Natural Resources
Suite 1152, East Tower
205 Butler Street, SE
Atlanta, Georgia 30334

Dear Mr. Reheis:

On July 17, 2001, the Georgia Department of Natural Resources (GA DNR) submitted to the Environmental Protection Agency its proposed 2004 motor vehicle emission budgets for nitrogen oxides (NOx) and volatile organic compounds (VOCs) for the Atlanta ozone nonattainment area. GA DNR submitted these budgets as a required component of the 1-hour ozone attainment demonstration for Atlanta. The submitted budgets are 106.25 tons per summer day (tpsd) for VOC and 225.12 tpsd for NOx.

The Agency has reviewed the budgets for adequacy for transportation conformity purposes and have found the proposed 2004 budgets submitted on July 17, 2001, to be adequate in accordance with 40 CFR Part 93.118 (e)(4) of the Transportation Conformity Rule. These motor vehicle emission budgets may be used for transportation conformity purposes upon the effective date of the adequacy determination which will be 15 days after publication in the Federal Register.

If I can be of further assistance, feel free to contact me.

Sincerely,

A. Stanley Meiburg
Acting, Regional Administrator
